Dear Customers,

Centuries ago, people's ancient desire to prolong the sunray's life by letting it into their homes found its tangible expression in the invention of the chandelier. Modern architectural trends and high standards of living have imposed growing demands on designers. This encompasses not only the functionality of all types of lighting fixtures, but also the aesthetic aspects as well.

Making every effort to comply with your demanding requirements, we have compiled this new catalog featuring lighting fixtures created in Germany under the new brand name 'Home Lighting Design'. This new line extends our range of lighting fixtures on offer, presenting new designs and styles.

We believe our catalog will inspire you to select lighting fixtures whose design will appeal to you as well as to your customers.

Our qualified experts will be pleased to answer all your questions concerning prices, delivery terms and technical data.

Jaroslav Demel
Vice-president of Sales

THE ART OF LIGHT - THE STORY OF PRECIOSA

Almost three centuries of chandelier-making tradition in Bohemia - our inspiration

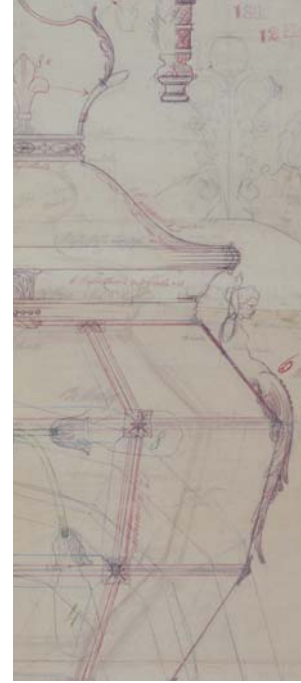

THE FIRST GLASSWORKS

As early as the 9th century, the first glassworks were founded in the territory of Bohemia. More than 500 years ago, Bohemian glassmaking made further advance in the former Kingdom of Bohemia, where skilled craftsmen began to discover ways of shaping glass into pleasing forms. By the beginning of the 17th century, Bohemian glassmakers were manufacturing glass mass closely resembling natural crystal. That is why it was later named 'Bohemian crystal' and became highly prized for its limpidity.

THE FIRST CHANDELIERS

In 1724, the first chandelier workshop was founded in the village of Prácheň just outside the North Bohemian town of Kamenický Šenov. Other workshops soon followed in the area. For their exquisite form and the purity of their mouth blown and hand cut crystal, the chandeliers from Kamenický Šenov soon became eagerly sought after by the aristocracy of that time.

THE FIRST DELIVERIES TO EUROPE

It was in the chandelier that crystal found its natural expression, and by the middle of the 18th century Bohemian crystal chandeliers were taking Europe by storm. As symbols of love of art, good taste, wealth and nobility, they became as prestigious as precious jewels. Not surprisingly, chandelier workshops in Kamenický Šenov and its environs were manufacturing chandeliers for palaces, churches and other luxurious buildings worldwide.

MASTERY AND TRADITIONS

Today, lighting fixtures from Preciosa harmoniously combine centuries-old glassmaking traditions with modern techniques and technologies. Innumerable types and a variety of shapes result from the perfect handwork and craftsmanship of Preciosa's glassmakers. Each touch of our masters' deft hands strikes one of the tones forming a rainbow chord that resounds people's homes each evening all over the world.

THE PRESENT

These days, our factory in Kamenický Šenov has hundreds of employees. More than twenty hand techniques take equal shares in the manufacture of chandeliers - cutting, lustring, painting, sand blasting, prism holes drilling, cast parts shaping, soldering, chasing, annealing, acid pickling, polishing, patina coating, assembling and other techniques.

PERFECT PRODUCTS

In the production of lighting fixtures, we use high-quality materials, such as brass, bronze and precious metals including 24-carat gold. Lighting fixtures from Preciosa are dressed with first-rate chandelier trimmings - both machine cut trimmings of the PREMIUM type with more than 30% PbO content and lead-free trimmings of the TRADITIONAL type, shaped in a historical style.

RESIDENTIAL LIGHTING FIXTURES

Continuing almost 300 years of glassmaking traditions, Preciosa ranks today among the biggest and highly respected producers of both classical and contemporary decorative lighting fixtures worldwide. High-quality crystal, brass, hand shaped castings and elegant, artistic design are the main features of the company's current production.

LIGHTING PROJECTS

Customized lighting fixtures and objects are designed for theaters, concert halls, hotels, private residences, churches and other special interiors. All these fixtures are works of art created with the assistance and under the supervision of designers, architects and investors.

Home Lighting Design

Since time immemorial, light and crystal have complemented each other perfectly. A combination of select full lead crystal, noble metals and other materials has formed the basis for this exclusive collection of lighting fixtures for more than ten years. Extensive experience in producing lead crystal in combination with excellent design lends our lighting fixtures their unmistakable style.

In 1992, the German Nachtmann company decided to base the design of their new line of lighting fixtures on the interaction between light and high-quality full lead crystal. This collection was marketed under the brand name Nachtmann Leuchten Design for years. Since 2005, the Preciosa - Lustry company has continued with this production line without making any changes to it.

Our main goal is to offer elegant, decorative lighting fixtures to match all types of interiors furnished in a wide range of styles, from modern to traditional.

HOME LIGHTING DESIGN

The HOLLYWOOD Collection

These decorative lighting fixtures are adorned with full lead chandelier trimmings (more than 30% of PbO) and all metal parts are gold-plated. Our 'Hollywood' fixtures will light up your interior with crystal flashes exploding from each of the glittering trimmings.

The LOS ANGELES Collection

This exclusive collection of lighting fixtures, wall clocks and mirrors will create a pleasant atmosphere of classical elegance in any interior. Crystal parts are made of full lead crystal and metal parts are plated with 24-carat gold. The complete harmony of forms pervades all items of this collection.

The collection has been rounded off with new fixtures and wall clocks with pendulums, for the first time presented in this catalog under the heading 'NEW'.

TABLE LAMPS

We are pleased to offer you an extensive collection of table lamps matching both classical and modern interiors. Various types of elegant lampshades designed by our artists using a variety of materials and the crystal frame of the lamp complement each other nicely.

The ALANYA Collection

The distinctive feature of this collection is the lamps' crystal pedestal, finished with a deep cut. A wide selection of lampshades in various colors enables you to harmonize any of the lamps with your interior.

The AMSTERDAM Collection

A basic oval shape characterizes the overall look of the collection. The patterns cut on crystal parts are an elegant match for the motifs on the shades.

The MONACO Collection

Amazing fireworks of rainbow flashes explode from the lamps' parts made of full lead crystal decorated with a deep cut. Gold- or silver-plated metal components harmoniously complete these exclusive fixtures.

The MESSINA Collection

Pleasant soft light from the bulbs placed not only under the shades, but also in the lamps' legs, brings out the characteristic tint of the Murano glass. These handmade unique objects may slightly vary in color intensity.

The MÜNCHEN Collection

Distinctive features of these lamps lend the collection a timeless look. Rectangular, hand-shaped lampshades harmonize with both the cut crystal components and high-quality metal parts. The lamps included in this collection are available in chromium as well as brass variants.

The ROM Collection

All elements of rectangular lampshades, glass as well as metal parts are in perfect harmony, creating one organic whole. The distinctive feature of the collection is the deep cut of the lamps' crystal legs in the form of floral motifs.

The MONZA Collection

The lamps included in this collection come in two sizes and different variants. Besides the lamps sand blasted on the inside, we also offer lamps in a variety of colors. The color of the lampshades always matches the color of the lamp's glass frame.

The MAGIC Collection

Table lamps included in this collection are only 10cm high and come in a variety of styles. The glitter of top-quality full lead crystal is best enhanced when lit up by reflector bulbs. Besides the lamps in the shape of a cube, also round lamps are available.

LED base

By means of this modern LED base, you can illuminate various glass objects in the best possible way. The play of colors incessantly changes the glitter of the object lit up from below.

The LAS VEGAS Collection

This extraordinary collection of elegant lighting fixtures is designed for both classical and modern interiors. The light from the fixtures is enhanced by halogen bulbs. The simple but timeless design of the fixtures is based on a harmonious combination of full lead crystal parts and gold- or chromium-plated components.

The collection has been rounded off with new fixtures, for the first time presented in this catalog under the heading 'NEW'.
